

Pharma Majors Collaborate for Clinical Trial of Investigational Oral Anti-Viral Drug Molnupiravir for COVID-19

Cipla, Dr. Reddy's, Emcure, Sun Pharma and Torrent to collaborate for clinical trial of investigational anti-viral drug Molnupiravir for COVID-19

India, June 29, 2021 - Cipla Limited (BSE: 500087; NSE: CIPLA EQ, referred to as "Cipla"), **Dr. Reddy's Laboratories Ltd.** (BSE: 500124, NSE: DRREDDY, NYSE: RDY, NSEIFSC: DRREDDY, hereafter referred to as "Dr. Reddy's"), **Emcure Pharmaceuticals Limited** (hereafter referred to as "Emcure"), **Sun Pharmaceutical Industries Limited** (Reuters: SUN.BO, Bloomberg: SUNP IN, NSE: SUNPHARMA, BSE: 524715, "Sun Pharma" and includes its subsidiaries and/or associate companies), and **Torrent Pharmaceuticals Limited** ("Torrent", BSE: 500420, NSE: TORNTPHARM), announced today that the five companies will collaborate for the clinical trial of the investigational oral anti-viral drug Molnupiravir for the treatment of mild COVID-19 in an outpatient setting in India.

Between March and April this year, these five pharma companies had individually entered into a non-exclusive voluntary licensing agreement with Merck Sharpe Dohme (MSD) to manufacture and supply Molnupiravir to India and over 100 low and middle-income countries (LMICs).

The five pharma companies have entered into a collaboration agreement, wherein the parties will jointly sponsor, supervise and monitor the clinical trial in India. As per the directive of the Subject Expert Committee (SEC) of the Central Drugs Standard Control Organization, Dr. Reddy's will conduct the clinical trial using its product, and the other four pharma companies will be required to demonstrate equivalence of their product to the product used by Dr. Reddy's in its clinical trial.

Following the clinical trial protocol approval given by the Drugs Controller General of India, the clinical trial will be conducted for the treatment of mild COVID-19 in an outpatient setting. It is expected to take place between June and September this year across India with the recruitment of 1,200 patients. Such collaboration for a clinical trial is a first of its kind within the Indian pharma industry, and will aim to investigate yet another line of treatment in the collective fight against the COVID-19 pandemic. On successful completion of the clinical trial, each company will independently approach the regulatory authorities for approval to manufacture and supply Molnupiravir for the treatment of COVID-19 in India.

Molnupiravir is an oral anti-viral that inhibits the replication of multiple RNA viruses including SARS-CoV-2. It is presently being studied by MSD, through a collaboration with Ridgeback Biotherapeutics, in a Phase III trial for the treatment of non-hospitalized patients with confirmed COVID-19 globally.

About Cipla Limited: Established in 1935, Cipla is a global pharmaceutical company focused on agile and sustainable growth, complex generics, and deepening portfolio in our home markets of India, South Africa, North America, and key regulated and emerging markets. Our strengths in the respiratory, anti-retroviral, urology, cardiology, anti-infective and CNS segments are well-known. Our 46 manufacturing sites around the world produce 50+ dosage forms and 1,500+ products using cutting-edge technology platforms to cater to our 80+ markets. Cipla is ranked 3rd largest in pharma in India (IQVIA MAT April '21), 3rd largest in the pharma private market in South Africa (IQVIA MAT April 21), and is among the most dispensed generic players in the U.S. For over eight decades, making a difference to patients has inspired every aspect of Cipla's work. Our paradigm-changing offer of a triple anti-retroviral therapy in HIV/AIDS at less than a dollar a day in Africa in 2001 is widely acknowledged as having contributed to bringing inclusiveness, accessibility and affordability to the centre of the HIV movement. A responsible corporate citizen, Cipla's humanitarian approach to healthcare in pursuit of its purpose of 'Caring for Life' and deep-rooted community links wherever it is present make it a partner of choice to global health bodies, peers and all stakeholders.
